Krzysztof Niedzielski

Lead Cloud DevSecOps Engineer | Cracow, Poland

LinkedIn: linkedin.com/in/krzysztof-niedzielski | **Email:** kniedzielski1111@gmail.com | **GitHub:** github.com/Pucenty

Automate or die trying. Creative, critical, logical and long-term thinker with attention to detail and a passion for well-designed automation, cloud computing, and cybersecurity. Expert in architecting secure, scalable cloud-native environments and fostering a secure-by-design culture.

Technical Skills

Category	Skills
Cloud & Orchestration	Google Cloud Platform (GCP), Kubernetes (GKE), Cloud Run, Cloud Functions, Istio Service Mesh, Docker, Terraform, Ansible, Linux Server, Windows Server
DevSecOps & CI/CD	Cloud Build, Skaffold, GitOps, Jenkins, Maven, Gradle, Nexus IQ, SonarQube, SAST/DAST, HashiCorp Vault, HashiCorp Packer
Networking & Mesh	Istio Service Mesh, GCP Hybrid Networking, Cloud DNS, VPC Design, Cisco Networking
Observability	OpenTelemetry, Prometheus, GCP Cloud Monitoring & Logging, Elastic Stack
Development & Data	Python, Java, Spring Boot, SQL, BigQuery, PostgreSQL, Apache Airflow

Professional Experience

HSBC

Lead Cloud DevSecOps Engineer | Mar 2026 – Present

- Shifting security left by integrating robust security practices across the entire SDLC and automating checks in Cloud Build.

- Accelerated deployment velocity and enhanced related metrics like LTTD and Vulnerability Remediation Time.
- Implemented Skaffold for streamlined local development and championed Trunk Based Development principles.
- Engineered secure-by-default solutions by enforcing token-based authentication over static keys and automating secure secret delivery to workloads.
- Automated Postgres-to-BigQuery syncs and secured Cloud SQL access with Auth Proxy and Private Service Connect (PSC).
- Enhanced inter-service security and reliability using Istio Service Mesh for zero-downtime deployments and certificate management.

Lead Cloud DevOps Engineer | Jun 2024 – Feb 2026

- Provided technical leadership for the DevOps team in building a secure, event-driven multi-service bank application from scratch.
- Designed and implemented infrastructure and GitOps-style CI/CD pipelines with advanced security scanning.

Cloud DevOps Engineer | Aug 2021 – Jun 2024

- Managed Big Data infrastructure (Elastic Stack) and optimized CI/CD pipelines within GCP.
- Cooperated with various teams to provide for HSBC's fraud detection platform – Quantexa.
- Established monitoring, dashboards and alerting using Terraform; introduced custom metrics for application services.

IBM

Site Reliability Engineer | Sep 2020 – Aug 2021

- Managed production infrastructure and resolved complex issues for global customer environments (IBM Cognos Analytics).
- Participated in on-call rotations and responded to events in a true SRE culture.
- Provisioned new client environments in IBM Cloud using Terraform.

IT Solution Factor

Junior System Engineer | Jan 2020 – Sep 2020

- Supervised customer infrastructure health via security and event management system (IBM QRadar).
- Configured and tested network setups including firewalls and email servers.

- Prototyped SMS gate UI app in Python and automated malware-infected attachment solutions in JavaScript.

Certifications & Education

- **Professional Cloud DevOps Engineer** – Google (Oct 2026 – Oct 2028)
- **Associate Cloud Engineer** – Google (2024)
- **Docker Certified Associate (DCA)** – Mirantis (2024)
- **Kielce University of Technology** – Information Technology (2018–2022)

Cloud, DevOps & Security Specialized Training

- Google Cloud DevOps Engineer Track (Parts 1-4)
- Google Cloud Network Engineer Track (Parts 1-4)
- Managing Apps on Kubernetes with Istio (2026)
- Docker Mastery: with Kubernetes +Swarm from a Docker Captain
- The Complete Networking Fundamentals Course (CCNA)
- The Complete SSL and TLS Guide: HTTP to HTTPS

Other Technical Training

- Java Masterclass 2025: 130+ Hours of Expert Lessons
- Learn C++ by Creating
- Gradle for java developers
- Apache Spark with Scala - Hands On with Big Data!
- 100 Days of Code™: The Complete Python Pro Bootcamp
