Profile

I am a DevOps Engineer with 3 years of experience in the cloud.

Big fan of well-designed automation and utilizing cloud products to reduce maintenance and increase overall company happiness.

Google Cloud Platform is my speciality - currently about to take GCP Certified DevOps Engineer exam.

I consider adaptability, fast learning, debugging skills and openness to new ideas my biggest qualities. Also, most people consider me very easy to work with.

Employment History

Cloud DevOps Engineer, HSBC

AUGUST 2021 – PRESENT

Cooperated with various teams of specialists to provide for HSBC's fraud detection platform - Quantexa.

Maintained and developed various Jenkins pipelines for deploying and managing infrastructure in Google Cloud or testing developer code. Established monitoring, dashboards and alerting using Terraform. Introduced custom metrics for better application services monitoring. Enabled audit logs, added new labels for better cost visibility and setup logging exports to BigQuery. Analysed and reduced compute or storage fees by adding and adjusting lifecycle rules. Reduced BigQuery costs by switching to slot model. Directed golden images creation and promotion. Advocated for usage of cloud solutions and transition from on-premise. Enabled new Google APIs like PubSub. Managed service account and user group permissions in GCP. Troubleshoot network infrastructure like loadbalancers, healthchecks and firewall rules.

Partook in shift from Jenkins to more modern workflow orchestration tools like Apache Airflow. Took part in switching Jenkins nodes from VMs to Docker and POC of application migration to Kubernetes.

Supervised key release processes like ETL operating on Dataproc cluster in a full Elastic Stack. Fixed any issues on the go and resolved various bugs. Introduced new scripts for autohealing, key rotation etc. Actively participated in release process, personally conducting many new application version deployments into production. Enhanced ETL logic in Scala. Performed product upgrades and adjusted code build process in Gradle. Organized packages in Nexus, found and fixed multiple CVEs or GCP violations.

Site Reliability Engineer, IBM

SEPTEMBER 2020 – AUGUST 2021

My team was a first line of response to incidents of IBM's global business intelligence suite - IBM Cognos Analytics. Participated in on-call rotations, responded to events, actively troubleshooted issues in a true SRE culture with highly developed incident management team.

Provided level 3 support to customers, maintained and updated their systems in out-of-office hours. Enabled new backend features like SFTP.

Provisioned new client environments in the IBM Cloud using Terraform.

Education

Kielce University of Technology

SEPTEMBER 2016 – SEPTEMBER 2020

Mechanical Engineering

Courses

Google Certified Associate Cloud Engineer, Cloud Guru

Google Cloud DevOps and SREs (GCP DevOps Engineer Track Part 2), Cloud Guru

Google Cloud CI/CD Pipelines (GCP DevOps Engineer Track Part 3), Cloud Guru

Monitoring, Managing, and Maximizing Google Cloud Operations (GCP DevOps Engineer Track Part 4), Cloud Guru

Java 8 Masterclass, Tim Buchalka (Udemy)

Gradle for Java Developers, Bharath Thippireddy (Udemy)

The Complete Networking Fundamentals Course. Your CCNA start, David Bombal
